DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention: Group I-Figures 1-1a; Group II-Figures 2-2a, Group III-Figure 3; and Group IV- Figures 4-4c.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 24 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Application/Control Number: 10/708,253 Page 3

Art Unit: 3742

During a telephone conversation with Mr. Koering on 6/23/05 a provisional election was made without traverse to prosecute the invention of I, claims 1-4, 6-10, 12-14 and 18-26.

Affirmation of this election must be made by applicant in replying to this Office action. Claims 5, 11 and 15-17 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Information Disclosure Statement

4. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Specification

5. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: there is no proper antecedent basis for "the first release" and "a second boost release". For the purposes of examining, the elected species Figures 1-1a which has the

Art Unit: 3742

plunger like controller device 19 has the first and second release as it being pushed in and out of the housing 14.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claim 14 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 14, there is no proper antecedent basis for the "shuttle", the "frame"

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 9. Claims 1-4, 6, 8-10, 12, 14, 18, 19 and 22-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Ohayon (US 5,810,253).

Ohayon shows the device claimed including a housing with an opening for containing a fluid therein, and means for orienting the device, means for controllably releasing a predetermined amount of the volatile substance to an absorbent emanator made of a cardboard which is a cellulose material, the housing having means made of a rigid material for isolating and protecting the volatile substance, and a shuttle with a chamber for discharging the volatile substance to a discharge hole (see Figure 11).

Application/Control Number: 10/708,253 Page 5

Art Unit: 3742

Claim Rejections - 35 USC § 103

10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 11. Claims 7 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ohayon (US 5,810,253) in view of Huang (US 6,805,306) or Marquiss (US 4,846003).

Ohayon shows the device claimed except the control release means that is electrically operated.

Huang and Marquiss shows that it is well known in the art to operate a plunger electrically rather than manually. In view of Huang or Marquiss, it would have been obvious to one of ordinary skill in the art to adapt Ohayon with an electrically operated plunger as the control means to more conveniently release the volatile substance.

With respect to claim 13, Ohayon shows a seal which seals off the shuttle which further includes a spring contact with the shuttle movement. While Ohayon does not shows a plurality of seals, it would have been obvious to one of ordinary skill in the art to provide a multiple number of seals along the shuttle to ensure that the volatile substance is not leaked through the shuttle within the housing member.

12. Claims 20 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ohayon (US 5,810,253) in view of Joshi (US 5,932,204).

Ohayon shows the device claimed except a heating element.

Application/Control Number: 10/708,253

Art Unit: 3742

Page 6

Joshi shows a device for controllably releasing a volatile substance, and Joshi further

shows a heating element provided to a porous emanator to increase the volatilization of the

substance. In view of Joshi, it would have been obvious to one of ordinary skill in the art to adapt

Ohayon with a heating element to the emanator to further increase the volatilization of the

volatile substance and its flow from the emanator.

13. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Sang Y. Paik whose telephone number is 571-272-4783. The

examiner can normally be reached on M-F (9:00-4:00) First Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Robin Evans can be reached on 571-272-4777. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
